HAND TRUCKS & CUSTOM STORAGE RACKS

Light Duty a

The light duty, 013 Hand Truck makes it easy for operators to maneuver. The operator slides the tongue of the truck under the stack and lifts the entire stack by tilting back on the truck. The operator balances the weight of the stack. These handtrucks are manufactured from heavy duty 14 gauge - 1" round cold rolled steel tubing, and are MIG welded, using a solid 1/2" steel rod axle. Two 10" solid rubber tires carry the load and one 2-1/2" swivel caster is used for positioning topick up and place the stack of chairs.

Medium Duty b

The medium duty, 017 Five Wheel Hand Truck is constructed of 14 gauge, 1" tubular steel, five wheels for easy maneuvering with two 10" hard rubber wheels to carry the load and two 4" rubber swivel casters to steer, while one 2-1/2" swivel caster is used for positioning the cart to pick up the stack. The #017 design reduces housemen's fatigue by placing more of the load on the cart. Ideal for larger banquet facilities and hotels.

Recommended for high traffic environments.

Heavy Duty c

The heavy duty Elite 015 Series features high-strength 1-1/2" square steel tubing in the back support and lift arm. Utilizing five of our proven 8" diameter roller bearing caster wheels, the Elite 015 hand truck moves swiftly and safely.

The square tubing is covered with TIVAR™ Ultra High Molecular Weight Polyethylene, (UHMW-PE), and riveted in place for a strong and lasting connection.

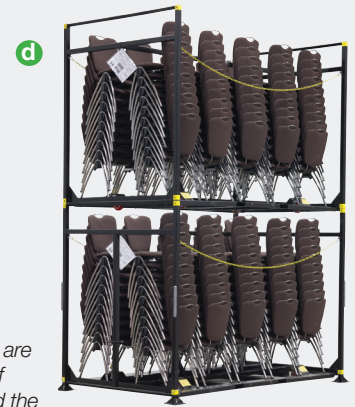

Recommended for high traffic environments.

Custom Racks d

To specify 020 storage racks, please contact MTS. We will design custom storage racks to meet your storage & handling requirements. Storage racks can be stacked three high and maneuvered individually on the built-in hard rubber casters and/or transported by forklift using the integral fork channels. These racks can be modified to connect together to be towed with a tow motor and then stacked. Storage racks will be sized to your storage requirements by chair model and/or will be designed to your building/door opening requirements.
